NubiBill Automated Financial Reconciliation Report

DISPOSABLE TEST FIXTURE - Suman Enterprises | 01/10/2026 - 20/10/2026
Report Scope: ALL_OUTLETS_IN_BUSINESS
Business IDs: b1 | Included outlets: see inclusion schedule

INSUFFICIENT DATA | Automated data quality 75/100

This report is not a statutory audit, CA certification, tax advice or filing approval. Missing values are shown as INSUFFICIENT DATA.

Business and outlet inclusion

Business ID	Business	Outlet ID	Outlet	Inclusion	Lifecycle
b1	Suman Enterprises	o1	Kolkata Hardware Shop	INCLUDED	Active
b1	Suman Enterprises	o2	Historical outlet with a long descriptive name for the financial comparison table	INCLUDED	Historical / inactive

Business tax identities

Tax amounts remain grouped by business. Current business GST metadata is not a historical GST registration certification and input tax is not automatically eligible ITC.

Business ID	Business name	Recorded GSTIN	Currency	Identity evidence
b1	Suman Enterprises	19ABCDE1234F1Z5	INR (existing paise contract)	NOT_VERIFIED

Outlet financial comparison

Business expenses remain separately unallocated; the consolidated total equals outlets plus displayed unallocated business expenses.

Business / outlet	Net revenue	Net purchases	Batch COGS	Salary accrual	Operating
b1/o1 Kolkata Hardware Shop	INR 6800.00	INR 1000.00	INR 200.00	INR 0.00	INR 0.00
b1/o2 Historical outlet with a long descriptive name for the financial comparison table	INR 0.00	INR 0.00	INR 0.00	INR 0.00	INR 0.00
Unallocated business overhead	-	-	-	-	INR 0.00
CONSOLIDATED TOTAL	INR 6800.00	INR 1000.00	INR 200.00	INR 0.00	INR 0.00

Trading account and profit and loss

Return amounts are deducted once from purchases. A nonzero COGS difference prevents a reconciled profit statement.

Cash-flow observed events

Actual collections and disbursements only. Advances, payroll settlements and expenses are not counted again from their parent documents. Noncash offsets are excluded. Opening/closing cash is unavailable.

Scope	Source	Event	Mode	Inflow / (outflow)
No observed records; see source coverage.				

GST rate and classification reconciliation

Missing rates stay UNKNOWN; nil, exempt, non-GST and out-of-scope require an explicit snapshot classification.

Business / class	Rate	Taxable	CGST	SGST	IGST	Cess
b1 / NIL_RATED / INTRA_STATE	0.0%	INR 1800.00	INR 0.00	INR 0.00	INR 0.00	INR 0.00
b1 / TAXABLE / INTRA_STATE	18.0%	INR 5000.00	INR 450.00	INR 450.00	INR 0.00	INR 0.00
OBSERVED LINE TOTAL	All displayed classifications	INR 6800.00	INR 450.00	INR 450.00	INR 0.00	INR 0.00

HSN / SAC reconciliation

Quantities are saved invoice-line commercial quantities in their saved UQC; HSN and UQC are never copied from current catalogue data.

Business / class	HSN / UQC / quantity	Taxable	CGST	SGST	IGST	Cess
b1 / NIL_RATED / INTRA_STATE	8201 / NOS / 1.0	INR 1800.00	INR 0.00	INR 0.00	INR 0.00	INR 0.00
b1 / TAXABLE / INTRA_STATE	8201 / NOS / 1.0	INR 5000.00	INR 450.00	INR 450.00	INR 0.00	INR 0.00
OBSERVED LINE TOTAL	Separate UQC quantities above	INR 6800.00	INR 450.00	INR 450.00	INR 0.00	INR 0.00

Item and outlet inventory audit

Scope / batch / variant	Opening qty	Inward qty	Outward qty	Closing qty	Opening / closing value	Status
b1/o1 batch1 v1 Name not saved	0.0	10.0	2.0	8.0	INR 0.00 / INR 800.00	Batch receipt cost; qty in base units

Inventory movement source detail

Posted batch quantities use thousandths. Purchases, sales, returns, adjustments and transfers remain separately identifiable; unknown historical costs are not invented.

Scope / variant	Movement source	Type / reference	Inward base qty	Outward base qty
b1/o1/v1	inventory_batch_movements/receipt	PURCHASE_RECEIPT / grn1	10.0	0
b1/o1/v1	inventory_batch_movements/sale	SALE / i1	0	2.0

Internal transfer eliminations

Only explicit internal events are excluded. A complete inter-outlet receivable/payable ledger is unavailable; no hypothetical elimination is inserted.

Scope	Source	Treatment	Evidence / limitation
No observed records; see source coverage.			

Customer receivables and aging

Scope	Invoice	Customer	Observed due	Days bucket	Basis
No observed records; see source coverage.					

Supplier payables and aging

Scope	Bill	Supplier	Observed due	Days past due	Basis
b1/o1	p1	NOT_VERIFIED	INR 680.00	20	Current snapshot; MSME NOT_VERIFIED

Salary Khata and allocation snapshots

The same business liability may be referenced by several outlet allocation rows: do not sum repeated references. Dated settlement events determine the liability; salary advances are receivables, never salary expense.

Business	Period	Outlet	Saved expense	Business net liability	Basis
No observed records; see source coverage.					

Operating expenses and unallocated overhead

Scope	Source	Category	Recorded amount	Treatment
No observed records; see source coverage.				

Actual monthly activity

Only actual invoice months in the requested period are shown; no synthetic annual extrapolation.

India calendar month	Net revenue
2026-10	INR 6800.00

Automated validation and scoring

Only PASS earns its disclosed weight. Missing evidence earns zero. Score is internal data quality and cannot imply statutory certification.

Check	Status	Weight / 100	Evidence criterion
Sales reconciliation	PASS	10	Saved net taxable revenue versus header totals; no second discount deduction.
Purchases reconciliation	PASS	10	Approved bills only, actual purchase GST components; returns require approved credit evidence.
COGS and stock reconciliation	PASS	15	Batch movement cost versus opening + purchases + inward costs - closing. Difference: INR 0.00
Trading account balance	PASS	10	No balancing profit is invented. Missing historical inventory blocks trading conclusion.
Balance sheet completeness	NOT_VERIFIED	10	Opening trial balance, assets, capital and bank evidence unavailable.
Cash and bank reconciliation	NOT_VERIFIED	10	Actual supported events shown; opening and closing balances unavailable.
GST and HSN completeness	PASS	10	All invoice snapshots must reconcile with HSN/rate/component schedules. Unknown classification is not zero GST.
Customer and supplier balances	NOT_VERIFIED	5	Current observations cannot prove historical as-of reconciliations.

Check	Status	Weight / 100	Evidence criterion
Salary and expense coverage	PASS	10	Saved salary allocations; unclassified expenses and partial salary periods block complete coverage.
Outlet and synchronization coverage	PASS	10	Each source must have a completed covering local query, no pending records and no unresolved conflicts. Observed pending=0.

Statutory validation checklist

Check	Status	Missing evidence
Cash threshold / aggregation checks	NOT_VERIFIED	Full party/day/event aggregation and current legal applicability
Invoice sequence continuity	NOT_VERIFIED	Complete series, cancellations and sequence registers
MSME payment obligations	NOT_VERIFIED	Verified supplier MSME classification and contractual terms
Presumptive taxation / audit exemption	NOT_VERIFIED	Taxpayer, profession, receipts, exclusions and current law
GST filing / eligible ITC	NOT_VERIFIED	Portal reconciliation, eligibility and complete statutory evidence

Exceptions and unresolved differences

Scope	Code	Evidence / action
No observed records; see source coverage.

Accounting assumptions and limitations

Limitation
Combined business totals are an explicitly selected management view. GST schedules remain separated by business; no cross-registration ITC settlement or unsupported inter-business balance elimination is performed.
Internal automated review only. Not a statutory audit, CA certification, tax advice or filing approval.
INR integer paise; inclusive India calendar dates (UTC+05:30), exclusive next-day boundary. Sales: invoiceDate/createdAt. Purchases: invoiceDate. Expenses: expenseDate. Cash: transactionDate. Salary: saved earning-period allocations.
Current customer/supplier balances are shown as observed snapshots, not asserted historical balances. Aging uses report end. Complete receipt allocation and opening balances are unavailable.
Historical fixed assets, depreciation, opening cash/bank, capital, drawings and retained earnings are not established by existing contracts. Balance sheet and closing cash remain INSUFFICIENT DATA.
Batch costing uses immutable batch movements and approved bill taxable cost plus allocated bill charges, quantities in thousandths. Current catalogue selling prices are never inventory costs. Legacy stock without consistent units/cost history is unavailable.
Input GST is observed purchase tax, not verified eligible ITC. Statutory cash thresholds, MSME rules, 44AD eligibility and invoice continuity require independent review.
Business overheads are included once when every business outlet is selected; no allocation is invented. Payroll liability is business-level unless saved settlement allocations support outlet liabilities.
Salary information is owner-authorized with historical allocation and settlement evidence; employee names are omitted.
Local snapshot completeness is limited to displayed sync checkpoints; it does not prove the absence of newer remote transactions. Report reads never initiate synchronization.
